

DATA SHEET

Engage

Version 5.0

TURBOCHARGE YOUR MAPINFO PROFESSIONAL®
WITH EXTENSIVE PRODUCTIVITY TOOLS

Summary

Engage is a powerful suite of tools that extend the efficiency and analytical capabilities of MapInfo Professional.

Benefits

- Efficient control of your workspace - map window tools and advanced selection options.
- Powerful real-time data visualisation and interaction
- Fast map output - scaled and customised.
- Simple image rectification at your fingertips.
- Explore the 4th dimension with the temporal analytics of Engage and uncover data trends in those hard-to-find places.

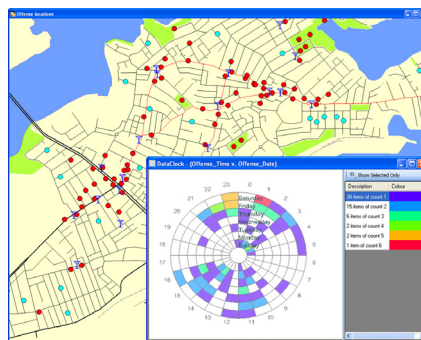

OVERVIEW

Version 5.0 adds a new Data Clock display type that enhances GraphMap's temporal analytical abilities, a time-saving search function for finding Engage tools by keyword or tool name, and a range of other improvements.

EngageAnalytics

New Data Clock graph type

The new Data Clock graph type is ideal for Time/Frequency or Temporal analysis, such as pollution monitoring in streams, water or salinity-level monitoring in bores, sewerage/ water discharge rates and wind direction related data. Any of the following date or time intervals can be extracted from a Date/Time field and displayed as either exterior wedges or interior circles of the clock:

Combine time and location analysis of crime data using GraphMap's new Data Clock display type

- Year
- Month of Year
- Day of year
- Day of Month
- Day of Week
- Hour of Day
- AM/PM
- Minute of Hour
- Second of Minute
- Unique

GraphMap tool enhancements

- A new visibility control, for filtering displayed points based on a grouping or filter field.
- Data preconditioning converts between data field types and includes a data preview.
- Redesigned Graph Builder wizard for more interactive graph creation.
- Customise the graph colours in a Pie chart.
- Improved setup of multiple table relationships.
- Improved Date/Time support on graphs.

Point Classifier enhancements

- Improved processing speed

New Create Registered Raster tool

- Capture a map window as an ECW image.

General Improvements

- Support for MapInfo Professional 10
- Direct link to our regularly updated and searchable online Knowledge Base.
- New Command Search function (either by tool name or keywords) means no more browsing through multiple menus to find that elusive tool.
- New Transparency/Translucency slider available in the Enhanced Layer Control for vector, raster and grid layers in MapInfo Professional 10 or later.

Specifications

Engage version 5.0 requires MapInfo Professional 8.5 to 10 on Windows XP or Vista.
